## **12 Senses: Unlocking the true power of your intuition**

Although most of us go through life believing that we possess only five senses, those of sight, sound, touch, taste and smell the fact of the matter is that we have twelve. We sometimes hear people say that there is a sixth sense but nobody really knows what it is or what it means. The sixth sense is really that of imagination which all humans have and is crucial in accessing and using the others. It is the bridge if you want between our reality and what lies beyond it.

### **The Twelve Senses are:**

- Sight
- Hearing
- Touch
- Taste
- Smell
- Imagination (sometimes called the sixth sense)
- The sense of Balance
- The sense of Warmth/Cold
- The sense of movement
- The sense of Substance
- The sense of Life
- The sense of Voice
